**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitani (US 5,737,503).

With regards to claims 1-21, Mitani either explicitly or inherently discloses all of the claimed limitations as is evidenced by the fact that Mitani discloses a print control device allows image data to be generated from intermediate data and printed by a printing unit. The print control device comprises generating means for generating image data from intermediate data memorized in an intermediate buffer, a band raster buffer for memorizing said image data generated by said generating means, a cache buffer for allowing cache of said image data generated by said generating means, and control means for reserving said intermediate buffer for memorizing said intermediate data by extending said band raster buffer to a full-raster buffer of one page or deleting said cache buffer, when the capacity of said intermediate buffer is insufficient. (Please note: col 5, line 54 – col 10, line 26).
